

Selenium Python testing on IE

Step by Step

Today we will :

1. How to run test on Internet Explorer
2. How to set Desired Capabilities

CODE

```
from selenium import webdriver

caps = webdriver.DesiredCapabilities.INTERNETEXPLORER
caps['ignoreProtectedModeSettings'] = True

path = "../drivers/IEDriverServer.exe"

driver = webdriver.Ie(executable_path=path, desired_capabilities=caps)

driver.get("https://google.com")

driver.find_element_by_name("q").send_keys("Abcd")
driver.find_element_by_name("btnK").click()

driver.quit()
print("Completed")
```
