

How to use WebDriver Manager

Automatic management of browser drivers for Selenium

How to install webdriver manager

How to add webdriver manager in project

Demo : run tests with webdriver manager

Commands

`pip install selenium`

`pip install webdriver_manager`

References

https://github.com/SergeyPirogov/webdriver_manager

Step 1 : goto cmd and run

`pip install webdriver_manager`

Step 2 :

For Chrome

```
from webdriver_manager.chrome import ChromeDriverManager
webdriver.Chrome(ChromeDriverManager().install())
```

For Firefox:

```
driver =
webdriver.Firefox(executable_path=GeckoDriverManager().install())
```

For Edge:

```
driver = webdriver.Edge(EdgeDriverManager().install())
```

For IE

```
driver = webdriver.Ie(IEDriverManager().install())
```
