Selenium Python testing on Chrome

Step by Step

Today we will :

1. How to run test on Chrome
2. How to run test on Headless Chrome
3. How to set Chrome Options

For headless chrome
Chrome browser v59+
ChromeDriver v.2.38+

CODE

```
from selenium import webdriver
from selenium.webdriver.chrome.options import Options

# chrome_options = webdriver.ChromeOptions()
chrome_options = Options()
chrome_options.add_argument("--headless")
chrome_options.add_argument("--disable-extensions")

driver = webdriver.Chrome(chrome_options=chrome_options,
executable_path="../drivers/chromedriver.exe")

driver.get("https://google.com")
print(driver.title)
driver.find_element_by_name("q").send_keys("Automation step by step")
driver.find_element_by_name("btnK").click()
print(driver.title)
driver.close()
driver.quit()
print("Completed")
```
